

BILL BRICKER

AI-Forward Sales & Partnerships Leader · I close the deals the biggest names in tech say yes to

Raleigh, NC · bill@courtana.com · 908-601-8152 · [linkedin.com/in/williambricker](https://www.linkedin.com/in/williambricker) · [Portfolio](#)

SELECTED PARTNERS Google · Microsoft · Stripe · PayPal · Payoneer · Meta

I close the partnerships the biggest names in technology say yes to — then 10x the work with AI. I founded Dreamship and, in year one, closed Google as a partner — a first-of-its-kind deal that drove an eight-figure channel and made the company, on the climb to \$35M+ revenue and four straight years of EBITDA profit. I went on to close Stripe, PayPal, Payoneer, Meta, and Microsoft, after cutting my teeth in enterprise sales at IBM and Northwestern Mutual. New-school, not old-school: I build the AI-native workflows that let one operator do the work of ten.

EXPERIENCE

Dreamship Cofounder & CEO (2018–Sep 2023); Board Chair 2018–Present · SF Bay Area

API-driven on-demand fulfillment platform. Built the company and its partnership engine from zero.

- **Closed Google as a partner in year one** — won director-level sign-off across 5–6 internal Google teams (trust & safety, business integrity, commercial) for a first-of-its-kind integration: a trust layer verifying high-volume merchants on Google Vision. The deal that made Dreamship — an eight-figure channel that ran 5+ years.
- **Made it repeatable** — closed follow-on partnerships with Stripe, PayPal, Payoneer, and Meta, plus a Microsoft / Bing–ChatGPT merchant deal. Closing the biggest names in tech became a system, not a one-off.
- Scaled from launch to \$35M+ revenue, ~\$85M GMV, 2.3M+ units, and 323% revenue CAGR (2019–2021) — 11x in 2020 (\$1.6M → \$17M); EBITDA-profitable four years running.
- Ran the operation behind it (21 fulfillment locations across 6 countries, delivery to 150+) and authored “How We Win,” the commercial operating framework; stepped back to Board Chair through a 2023 cancer diagnosis while the company stayed profitable.

Dreamship remains profitable and operating today; I serve as Board Chair.

Courtana / PickleBills Founder & CEO 2023–Present · Raleigh, NC

AI-native smart-court technology — the testbed for the AI-forward GTM I now bring to the table.

- Built a full AI video-analysis pipeline (Pickle DaaS) that turns raw court video into player, coaching, and venue intelligence at \$0.0054/clip — and shipped 40+ apps across 31 repos. Proof I sell the new way: AI-native workflows, built and run myself.
- Founded and commercialized an AI smart-court platform live in its first venues — defining a new category and learning the frontier-AI stack hands-on.

GearLaunch VP Sales & Marketing 2017–2018 · SF Bay Area

- Led sales & marketing for a 360° ecommerce / print-on-demand platform — seller acquisition, growth, and partner positioning in a fast-moving infrastructure market.

IntroStellar CEO / Cofounder 2015–2017 · SF Bay Area

- Founded a network-trust / referral product; built three versions on \$150K. The connector instinct still drives how I open doors and close partnerships.

WibiData Director of Sales 2014–2015 · SF Bay Area

- Sold an open-source big-data platform (NEA, Canaan, Mike Olson, Eric Schmidt-backed) into the Fortune 500 — early to the data wave, selling complex tech to technical buyers.

IBM / Netezza Watson Analytics Specialist / Netezza Brand Specialist 2012–2014 · SF Bay Area

- Sold seven-figure analytics and early-AI (Watson / cognitive) deals into the enterprise; achieved quota; selected for the IBM Summit Sales Program.

Northwestern Mutual College Unit Director / Financial Advisor 2006–2010 · Princeton, NJ

- Where I cut my teeth — cold calls to closes. Recruited and led a team; ranked top 10 nationally, \$6M+ total contract value across 150+ accounts.

EDUCATION

MBA — UNC Kenan-Flagler Business School BS, Finance — The College of New Jersey

CORE

Enterprise & founder-led sales · strategic partnerships & channel build from zero · partner economics & deal structuring · AI-native GTM workflows · pipeline & forecasting · dynamic AI-built collateral (Claude, Codex, Gemini)
