I turn complex technology into **revenue**: I close the partnerships the biggest names in tech say yes to, then build the systems that scale them.

- ◆ **Forward-deployed partnership closer** who landed Google, Stripe, PayPal, Meta, Microsoft, Payoneer, and Adobe as first-of-a-kind partners.
- ◆ **Zero-to-one builder** who scaled Dreamship to **\$35M+** revenue and ~\$85M GMV, and took Courtana from thesis to live pilots across 4 venues, 36 courts, and 760 users.
- ◆ **AI-native operator** who uses AI as a force multiplier across research, demos, collateral, and product feedback, and recruits high-leverage teams with no money and no brand.

01 SELECTED SALES & PARTNERSHIP PROOF

PARTNERS Google / Stripe / PayPal / Meta / Microsoft / Payoneer / Adobe

- **Google**: closed a first-of-its-kind year-one partnership with VP-level sign-off across 5–6 internal teams, built it into a **\$45M+** merchant ad-spend channel, then made closing tier-1 platforms a repeatable motion.
- **Dreamship**: scaled to **\$35M+** revenue, ~\$85M GMV, 2.3M+ units, 323% CAGR, and four years of EBITDA profitability.
- **Courtana**: raised **\$350K** and launched pilots across 4 venues, 36 courts, and 760 users; built a video pipeline that has processed 21,000+ clips.
- **Enterprise AI**: sold seven-figure IBM Watson and analytics deals before AI was a category; contributed to an 8-figure McKesson win.
- **Northwestern Mutual**: built an **\$8M** TCV book across 185 accounts and led a top-10 nationally ranked college-unit team.
